Engineered Slate, Onyx

The beauty of nature. The performance of Ply Gem.

For centuries, natural slate and cedar have been used to cover some of the most extraordinary houses. And while the beauty of these materials is undeniable, they're not the most dependable. Over time, exposure to the weather can make wooden shingles split and natural slate brittle among other things like fading and warping. Ply Gem Roofing was developed with these factors in mind — offering easy installation for builders, natural beauty for homeowners and performance everyone can rely on.

ENGINEERED CEDAR

NEW IN 2016

Rustic cedar. Lasting beauty.

Get the rustic look of milled split cedar shingles in a high-performance composite. The 3D laser engraving replicates the rich, natural textures of hand-split shakes found on the finest homes throughout the world, but requires none of the maintenance.

Colors

Weathered Grey

Weathered Brown

Timeless style inspired by nature.

The roof makes up about a third of a home's exterior. And although it's easy to overlook when choosing an exterior style, it plays an important role in the overall look of a home. Its color, shape and texture should be compatible with the home's design to create a seamlessly gorgeous exterior.

ENGINEERED SLATE

A color range inspired by natural slate.

Nature creates slate in a variety of colors and so does Ply Gem Roofing. Each tone is formulated using natural earth mined minerals in order to produce the most authentic hues. Easily coordinate exterior palettes from our four color families, Brownstone, Charcoal, Pewter and Sagebrush available pre-blended from our 12 distinct hues or shipped separately.

Color Families

Brownstone

4-color blend of Sienna, Harvest, Russet and Taupe (4:1)

Charcoal

3-color blend of Onyx, Granite and Platinum (3:1)

Pewter

2-color blend of Steel and Silver (60:40)

Simplified installation process.

- ▶ Unlike natural slate and cedar, our shingles are lightweight and do not require additional framing for support.
- ▶ There are also no special skills or tools required because we've added recessed nail flanges into each shingle to make installation simple.
- ▶ The shingles are practically indestructible - able to withstand typical worksite foot traffic without damage to the material. The result is more job completions in less time.

Hinged Hip & Ridge Shingles.

The “living hinge” Hip and Ridge shingles conform to any angle. They’re easy to install and look more authentic than one-piece ridge caps because they lay flat like natural slate shingles. The secret to the living hinge is its durable butyl tape which adheres to the underside of the shingles. It creates a flexible joint that ensures a perfect fit and a professional finish every time.

A good foundation starts at the top.

Mother Nature can really take a toll on a roof. So, Ply Gem Roofing is engineered to withstand whatever nature can throw at it. Our shingles withstand ultra violent rays, high winds and ice, they don't absorb water and they've even passed the industry's harshest fire testing. Made to tolerate the elements, our engineered roofing is as durable as it is beautiful.

SUSTAINABLE

50 year
WARRANTY
2YR LABOR

For over 70 years, professionals and homeowners alike have trusted Ply Gem products like engineered cedar and slate shingles. And we're so confident in the quality of our roofing products that we back them with a 50-year limited warranty that also covers the first two years of labor. It's one of the most comprehensive warranties in the business, backed by one of the biggest manufacturers of exterior building products in North America.

10 year no fade warranty
